

FORTRESS IRON PICKETS

- Fortress Iron Pickets are galvanized inside and out and powder coated with a rich, polyester finish that is available in seven different colors: Antique Bronze, Hunter Green, Oil-Rubbed Bronze, Rust, Taupe, White and Gloss Black.
- The square picket is a straight picket, 5/8" in diameter, that gives the customer 3 different design options: Plain, 1 Basket, and 2 Basket. You can mix and match pickets to create your own custom look.
- The round picket is a straight picket, 3/4" in diameter, and also gives the basket design options. Fortress now offers the EZ Mount, which is a durable nylon mount that is safe for installation on any type of decking material, including treated lumber and the new ACQ lumber.
- EZ Mounts are offered in two different styles: Standard and Stairs. The standard mount is used for your normal, straight installation where you would normally drill 3/4" holes to insert the pickets. Now, you just attach the EZ Mount at each point, 4 inches apart, and drill into the chosen material. The stair mounts are available in 4 different colors and make stair picket installation a snap. Both are available in packs of 20.
- The rich look of iron and wood, along with the added visibility, make this product a dynamic decking product.
- All products are covered by a ten year limited warranty against corrosion, weathering, and manufacturers defects. All products have been tested and meet all requirements set by the ICC and ASTM for strength and finish. This product is designed to last a lifetime, so you can spend more time enjoying your life.

FORTRESS IRON PANELS

- Fortress Iron fence panels are galvanized inside and out and powder coated with a rich, polyester, gloss black finish with the highest standard of UV protection.
- Deck railings require no assembly and can be installed with virtually any other decking product on the market. The easy to use bracket system saves time and money.
- All railings are made for 8-foot on centers and meet all standard railing codes. You can choose from 3 different heights, 32", 36" and 40" as well as two different grades: thickset commercial and traditional residential.
- All welds are hand ground and smoothed with a zinc coating applied before powder coating for maximum protection and an unbelievable look of distinct quality. There is no other weld on the market that comes close to matching this.
- Fortress has a large line of accessory items that allow the customer to customize the railing to obtain a specific design to his or her own liking. The accent top panels and inserts allow for added design features and a custom look.
- All products are covered by a ten year limited warranty against corrosion, weathering, and manufacturers defects. All products have been tested and meet all requirements set by the ICC and ASTM for strength and finish. This product is designed to last a lifetime, so you can spend more time enjoying your life.
